

LearnHub

Document 2: Project Planning & Gantt Chart

Prepared by: Eman Al-Aodat | Mobile Application Development Course

1. Project Planning Overview

The LearnHub project follows an 8-week development schedule structured across five main phases: Planning & Requirements, Design, Development, Testing, and Deployment & Documentation. The project is a solo effort by Eman Al-Aodat, requiring careful time management across all phases.

1.1 Project Timeline Summary

Phase	Start Week	End Week	Deliverable
Planning & Requirements	Week 1	Week 2	Requirements doc, project plan
Design	Week 2	Week 4	Wireframes, use case diagrams
Development	Week 4	Week 7	Functional Flutter application
Testing	Week 7	Week 8	Test reports, bug fixes
Deployment & Documentation	Week 8	Week 8	Final app + documentation

2. Gantt Chart

The Gantt chart below illustrates the task schedule across 8 weeks. Shaded cells (purple) indicate active weeks for each task.

Task / Activity	W1	W2	W3	W4	W5	W6	W7	W8
Phase 1: Planning & Requirements								
Define problem statement & goals	■							
Gather requirements & user stories	■	■						
Choose SDLC model & tech stack		■						
Phase 2: Design								
UI/UX wireframes & mockups		■	■					
System architecture design			■					
Use case & data model diagrams			■	■				

Task / Activity	W1	W2	W3	W4	W5	W6	W7	W8
Phase 3: Development								
Splash & onboarding screens				■				
Home screen, search & filter				■	■			
Course detail & enrollment system					■	■		
Progress tracking & My Courses						■		
Profile & settings (dark mode, validation)						■	■	
SharedPreferences data persistence					■	■	■	
Phase 4: Testing								
Unit & widget testing							■	
Integration & UI testing							■	■
Bug fixing & performance review								■
Phase 5: Deployment & Documentation								
Prepare final documentation								■
Deploy to Android & iOS simulators								■

Legend: ■ = Active week for the task

3. Resource Plan

3.1 Human Resources

Name	Role	Responsibilities
Eman Al-Aodat	Full-Stack Mobile Developer	UI/UX design, Flutter development, testing, documentation

3.2 Technology Stack

- Programming Language: Dart
- Framework: Flutter (cross-platform for Android & iOS)
- State Management: Provider package (ChangeNotifier pattern)
- Local Storage: SharedPreferences package
- IDE: Visual Studio Code / Android Studio
- Version Control: Git & GitHub
- Testing: Flutter test framework
