

LearnHub

Document 6: System Use Case Diagram

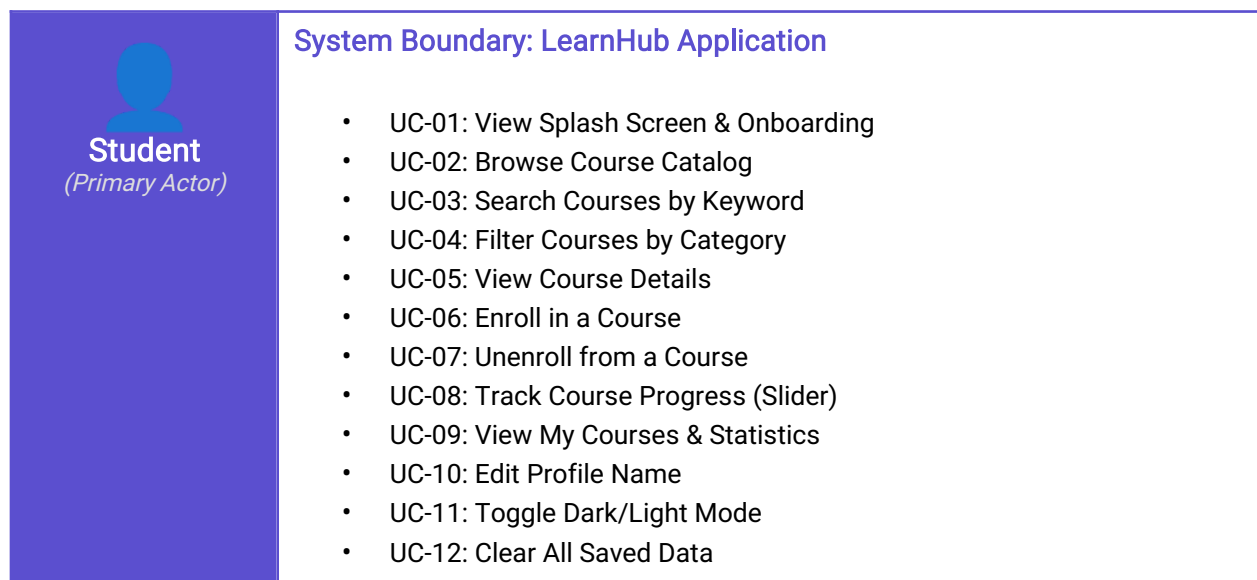

Prepared by: Eman Al-Aodat | Mobile Application Development Course

1. System Use Case Diagram

The Use Case Diagram below identifies the primary actor (Student/User) and all use cases available within the LearnHub mobile application system boundary.

1.1 System Boundary: LearnHub Mobile Application

Actor: Student (User) – The primary user who interacts with all features of the application.

1.2 Use Case Relationship Table

ID	Use Case Name	Type	Relationships
UC-01	View Splash & Onboarding	Primary	Precedes all other use cases (entry point)
UC-02	Browse Course Catalog	Primary	Includes: UC-03, UC-04
UC-03	Search Courses	Included	<<include>> in UC-02
UC-04	Filter by Category	Included	<<include>> in UC-02
UC-05	View Course Details	Primary	Extends UC-02; precedes UC-06, UC-08
UC-06	Enroll in Course	Primary	<<extend>> UC-05; precedes UC-08, UC-09
UC-07	Unenroll from Course	Primary	<<extend>> UC-05; removes from UC-09
UC-08	Track Progress	Primary	<<extend>> UC-05; requires UC-06

			first
UC-09	View My Courses	Primary	Depends on UC-06; displays results of UC-08
UC-10	Edit Profile Name	Primary	Independent; requires form validation
UC-11	Toggle Dark Mode	Primary	Independent; applies app-wide instantly
UC-12	Clear All Data	Primary	<<extend>> UC-10/UC-11; resets all state

1.3 Use Case Narrative Summary

The LearnHub system has one primary actor: the Student (User). All 12 use cases fall within the application system boundary. The main flows are:

- Onboarding Flow: UC-01 triggers only on first launch, then navigates to the main app.
- Discovery Flow: UC-02 serves as the hub that includes UC-03 (Search) and UC-04 (Filter) as sub-behaviors.
- Learning Flow: UC-05 (View Details) extends with UC-06 (Enroll), UC-07 (Unenroll), and UC-08 (Progress), which feed into UC-09 (My Courses).
- Personalization Flow: UC-10 (Edit Name), UC-11 (Dark Mode), and UC-12 (Clear Data) operate independently under Profile & Settings.
